Framework7

Framework7 - is a free and open source mobile HTML framework to develop hybrid mobile apps or web apps with iOS & Android native look and feel. It is also an indispensable prototyping apps tool to show working app prototype as soon as possible in case you need to.

The main approach of the Framework7 is to give you an opportunity to create iOS & Android apps with HTML, CSS and JavaScript easily and clear. Framework7 is full of freedom. It doesn't limit your imagination or offer ways of any solutions somehow. Framework7 gives you freedom!

Framework7 is not compatible with all platforms. It is focused only on iOS and Google Material design to bring the best experience and simplicity.

Framework7 is definitely for you if you decide to build iOS or Android hybrid app (iPhoneGap) or web app that looks like and feels as great native iOS and Google Material apps.

Ultra Easy To Use.
Not Harder Than Website!

The fastest way to develop beautiful HTML5 hybrid and mobile web apps

Experience streamlined development with zero-time setup, using the technologies you already know and love - JavaScript, HTML, and CSS.

Stay up to date!

Get updates on Onsen UI, Monaca and hybrid app development. No more than 2-3 times a month.
